A Synopsis

Mixed Signals is a joyful interaction of contemporary topics and local attitudes.

A zany, science-fiction flavour adds to the fun when, by a miracle of modern technology, the Friendship Development Unit endeavours to create the perfect Singapore woman!

And, but for one loose microchip, they very nearly succeed ...

What happens when this original creation is unwrapped and unleashed on Orchard Road society?

Find out on June 14th. And be ready for an evening of audacious comedy and laughter.
